EDUCATION

- Duke University Pratt School of Engineering** **August 2023 - December 2024**
M.Eng. in Artificial Intelligence Durham, N.C
• Relevant Courses: AI Modeling, Deployed ML - Cloud Systems At Scale, Applied Deep Learning, Applied ML Engineering.
- Duke University & Duke Kunshan University** **August 2019 - May 2023**
Dual Degree B.Sc. in Data Science. Major GPA: 3.6 Durham, N.C and Kunshan, China
• Full Scholarship. Relevant Coursework: Linear Algebra, Statistics, Data Analysis, Algorithms And Data Structures, Software Engineering Design & Implementation, Databases, Machine Learning, Statistical Modeling.

EXPERIENCE

- Origin AI** **January - May 2024**
Product Intern Durham, N.C
• Conducted market research to develop strategic product approaches to develop rapid go-to-market plans for Origin's offerings.
- Duke University Pratt School of Engineering** **September 2021 - June 2022**
Machine Learning Intern & Research Assistant At [Borsuk Lab](#) Durham, N.C
• Deployed 90th percentile-ranking CNN object detection model (PyTorch, Sklearn) after optimizing model trained on compiled labeled object detection dataset of 100,000+ images of oil tanks & containers from public aerial image data (pyqt, labeling).
- Duke University Computer Science Department** **August 2022 - December 2024**
Teaching Assistant For CS 307 & CS 308 - Advanced Software Design & Implementation Durham, N.C
• Ran office hours & mentored 40+ students to work in teams on large software (ML and other) projects (Python, Java, Maven, git).
• Conducted 200+ code reviews, graded assignments. 100% pass rate and favorable performance reviews - rehired every semester.
- Duke University Sanford School Of Public Policy** **June 2022 – August 2022**
Data Science Research Assistant Under Dr. Nick Carnes Durham, N.C
• Compiled dataset of legislature candidates (webscraping w/ BeautifulSoup) for ML regression model (Tensorflow, Pytorch, Pandas).
- Rhodes Information Initiative at Duke** **May - July 2022**
Data+ Data Modeling Summer Research Assistant At Visualizing Durham Public Schools Project Durham, N.C
• Consulted with Durham Public School administrators and stakeholders to do feature selection and identify most relevant data points for users to iteratively develop [data dashboard website](#) in 2-week sprint cycles with Agile workflow - 3000+ monthly visits.
- Duke Kunshan University Statistics Department** **June 2020 - March 2021**
Data Science Research Assistant Under Dr. Andrew MacDonald Remote
• Created end-to-end social media conspiracy posts data pipeline (Hadoop) to compile webscraped dataset (BeautifulSoup, pandas).
• Collaborated with the research team to publish analysis of sociological & psychological features of conspiracy creators with large-scale NLP sentiment analysis in R (tidyverse) and Python (Sklearn, Tensorflow, Pytorch, matplotlib).

PROJECTS

- ScriptScouts - Dynamic AI-Powered Webscraping API** **Spring 2024**
• Leveraged AI to develop and maintain reliable web scraping scripts. Created and hosted API that generates JSON responses from web scraping results to successfully dynamically scrape drug prices - enhancing data acquisition efficiency by ~50%.
- Bass Connections - Analyzing Systemic Housing Inequality, Under Dr. Thomas DeFrantz** **Fall 2021**
• Developed publicly showcased art gallery data display [fluid simulation visualization model](#) of racial housing inequality (Tensorflow).
• Created big-data large-scale microeconomic models to analyze housing inequality in Durham County (Sklearn, hadoop, pyplot).
- HealthCarolina - Interactive Portal For North Carolina Health Info & Statistics, Databases Final Project** **Fall 2021**
• Achieved 300+ monthly visits to [interactive N.C map website](#) highlighting health statistics based on geographical data modeling (GIS, numpy). Worked with a team of 4 to iterate features and optimize models for scale (Flask, PostgreSQL, MySQL).
- Bollywood Music Generation Deep Learning Model, Under Dr. Daniel Lim** **Fall 2020**
• Developed end-to-end Deep Learning pipeline to create AI-generated music [samples](#) with [RNN model](#) (Keras, music21).

SKILLS

- Programming Languages: Python, Java, C/C++. ML Libraries: TensorFlow, PyTorch, CoreFlow, Sklearn, Keras, Pandas, Numpy. Linear Algebra, Statistics.
- Spoken Languages: English, French, Mandarin, Kannada, Hindi.

CERTIFICATIONS & AWARDS

- GeorgiaTech's Robotech Hackathon 2022: Best Overall Hack, Second Best Design, Most Accessible Hack. 3000\$ in prizes and 5000\$ in startup seed funding. National Finalist, Alibaba GET Global Startup Challenge.*
- Online Certifications: Deep Learning Specialization and Introduction to ML, Coursera. CS50, EdX.
- Published author of sci-fi novel entitled *Cure Bereft*.
